

Fermentation Scientist/Engineer

Apotex Fermentation Inc. is a privately owned Canadian pharmaceutical company operating the largest Fermentation facility in Canada. This is a CGMP, FDA – regulated facility engaged in the production of Active Pharmaceutical Ingredients for the generic market worldwide. AFI has also, in recent years, been engaged in microbial fermentation-based contract manufacturing and R&D of therapeutics and nutraceuticals with clients in Europe and North America.

We are looking for a Research Scientist or Biochemical Engineer with primary responsibility for Fermentation R&D, including lab & pilot scale operations and scale-up to our production facility. The successful candidate will be expected to work in a multidisciplinary team with microbiologists, chemists and engineers to achieve company goals.

The successful candidate should have at least a M.Sc. in a relevant discipline (e.g. Microbiology or Biochemical Engineering). Work experience in an industrial environment is preferred.

This is a permanent position. Salary will be commensurate with qualifications and experience. An excellent benefits package is provided. Interested applicants may forward their resume to: Human Resources, Apotex Fermentation Inc., 50 Scurfield Blvd., Winnipeg, MB R3Y 1G4 Fax: (204) 989-9160 Email: hr@apoferm.mb.ca Web Site: www.apoferm.com We thank all applicants for their interest, however, only those selected for interview will be contacted.
